

Maryland Area Driver Rehabilitation Programs

Maryland Department of Transportation Motor Vehicle Administration (MVA) offers this list of providers as a customer convenience. MVA **does not** endorse or recommend any individual, business, or organization included on this listing. These providers **are not** employees of MVA and any service they provide is NOT a business transaction involving MVA. Costs for assessments and scheduling are determined by each provider.

- **Most** providers can offer **BOTH** in-office clinical assessments and behind-the-wheel driving assessments, and then driver rehabilitation training if necessary.
- **Some** providers can offer **ONLY** in-office **clinical assessments**; these providers are listed under **Clinical Assessments Only**, and another provider would have to perform the behind-the-wheel assessment and driver rehabilitation training, if necessary.

NOTE: For customers referred for a full assessment by MVA, both clinical and behind-the-wheel assessments are necessary.

- **Some** providers can offer an additional service with **adaptive equipment** (examples: spinner knob, hand controls, left-foot accelerator) and training; these providers are listed under the **Adapted** section that includes a note on the type of vehicles they service.
- Only a **few** providers can offer assessments for **first-time (novice) drivers**, who have never before been a licensed driver; these few providers are listed under **First-Time (Novice) Drivers**.

BOTH In-Office Clinical Assessments and Behind-The-Wheel Assessments
